 Bengaluru, Karnataka (Open to Relocate) +91-7478876252 Portfolio

SUMMARY

Full Stack Engineer with **1.5+ years of experience** building React.js, Next.js, and React Native apps for startups and product companies. I enjoy working across the full stack, from clean responsive UIs to Node.js and FastAPI backends, REST APIs, and AI integrations using LangChain and Gemini AI. Currently looking for a role at a startup where I can build things that matter and grow fast.

WORK EXPERIENCE

Studio137

Front-End Developer

Nov 2024 – Nov 2025

- Led development of **5+ production** React.js features and **20+ reusable UI components**, cutting average feature delivery time by **25%** through systematic abstraction
- Optimized performance via memoization, custom hooks, and lazy loading, reducing average page load time by **40%** and eliminating key rendering bottlenecks
- Owned **end-to-end API integration**, collaborating with backend engineers to define contracts and deliver seamless, high-performance user experiences.

ProjectStudio.ai

React App Developer

Nov 2025 – Apr 2026

- Architected and shipped **20+ core React Native screens** for an interior design SaaS platform, reducing on-site architect workflow steps by an estimated **30%**.
- Engineered **10+ reusable cross-platform UI components** (iOS & Android) from Figma specs, reducing design-to-dev handoff time by **20%** and achieving pixel-perfect consistency across both platforms
- Integrated **RESTful APIs** for real-time data sync, enabling on-site construction teams to access live project updates with sub-second response times

EDUCATION

Jaypee University of Engineering and Technology

Bachelor's Degree in Computer Science and Engineering

Nov 2021 – May 2025

Bahula Sasi Smriti High School

Senior Secondary (XII), Science

Jan 2012 – Jul 2020

PROJECTS

E-Mandi (Empowering Agricultural Trade Through Digital Connectivity)

- Designed and launched a full-stack **MERN** marketplace digitizing agricultural trade with role-based dashboards for farmers and buyers, real-time inventory management, and order tracking.
- Implemented a **secure OTP-based verification system** handling **100% of user transactions**, reducing unauthorized access attempts and ensuring end-to-end data integrity across **500+ registered users**
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js, REST APIs, OTP Authentication

PDF GPT (AI-Powered Document Chat System)

- Built a production-ready **full-stack AI chat** platform enabling semantic Q&A over uploaded PDFs using **vector search** (FAISS + HuggingFace embeddings) and **Google Gemini AI**, achieving contextually accurate answers over 50-page documents.
- Implemented **JWT-based auth**, multi-session chat history, and a **LangChain RAG pipeline** with FastAPI; deployed on Vercel + Render with end-to-end TypeScript type safety.
- **Tech Stack:** FastAPI, Python, MongoDB Atlas (VectorSearch), LangChain, Gemini AI, HuggingFace, React.js, TypeScript, Redux Toolkit

SKILLS

Programming Languages — C, C++, Python, JavaScript, TypeScript

FrontEnd Development — HTML, CSS, SCSS, Bootstrap, React.js, Next.js, React Native, Redux

BackEnd Development — Node.js, Express.js, FastAPI, REST APIs, JWT Authentication

Database Management — MongoDB (Atlas + Vector Search), MySQL, PostgreSQL, AWS

AI/ML — LangChain, Vector Embeddings, Semantic Search, Google Gemini API, HuggingFace Models

Tools & Technologies — Git, GitHub, Postman, VS Code, Vercel, Render
